FLEXIBLE BUSINESS APPLICATIONS

401K Data Interchange

for Microsoft Dynamics SL

Faster 401K Data Uploads

Designed for

by

401K Data Interchange

Speed up your 401K Data reporting today!

The 401K Data Interchange for Microsoft Dynamics SL generates a file containing the 401K data information of your employees for transmission to your bank. This file forwards the appropriate information for your 401K deposit and filing, ensuring accurate administration of your employees' Retirement Savings Plans. You don't have to manually create a spreadsheet with your Dynamics SL data, which saves you both time and money. You can track all appropriate deductions in Dynamics SL's Payroll, and they can be easily added to the export. If your bank's file format is not currently built in the product, you can have it added for a small fee. The 401K Data Interchange is custom built for Dynamics SL using the Dynamics SL Toolkit so it looks and feels exactly like any other Dynamics SL screen. Stop manually preparing your 401K data files today!

Take a look inside...

MAIN FEATURES:

- Process Employee Contributions and Loans for Your Plan.
- Automate Employee Demographic Information Updates.
- Supports Multiple Banks.
