by

## **Expanded Master Information**

**Create a richer, more detailed database for your Dynamics SL operations** 

The Expanded Master Information module allows you to store additional data for your Customers, Employees, Inventory Items, Projects and Vendors. There are 75 additional fields for each entity, allowing you to keep track of additional details crucial to your operations. A record for each Customer, Employee, Item, Project and Inventory Vendor is created automatically in the corresponding tables. The Expanded Master Information module is completely automated -

if you delete an Inventory Item, the corresponding item will be deleted from the table in the Expanded Master Information module as well. Use the Customization Manager to add any of the 75 fields from each table to the subscreen in the Expanded Master Information module. All of this in an easy to use module built using the Dynamics SL Toolset, which ensures it looks and feels just like Dynamics SL.
